

CRM Instructor's Course

Crew Resource Management Instructor (CRMI)

Course objectives

This CRMI core course builds on existing classroom experience to provide instructors with the specific skills required to deliver CRM training in the classroom. The course introduces the principles of lesson planning, the use of visual aids, lesson preparation and delivery. The course is highly practical and course members will be required to deliver practice lessons in order to consolidate the skills learnt.

During the 5-day course delegates will learn more on facilitation, feedback and critique. Each delegate will deliver 3 practice sessions, each of which will be fully debriefed by the tutor. Delegates will learn how to use and to debrief case studies, practical exercises and video programmes.
